

Decolonizing research: practical guidance from a feminist approach

A G E N D A

Dr. Michelle Lokot
cynara.co

Day 1: Why decolonize research and M&E?

Examining the legacy of colonialism for international development and humanitarian aid, identifying what 'decolonising' means, and discussing how feminist perspectives can be helpful in decolonising research and M&E

Day 2: Who shapes research and M&E and why? Scoping research and identifying methods

Identifying strategies and principles to decolonise research during the scoping phase and during the identification of research methods

Day 3: Who collects data and what methods are 'decolonial'? Data collection and alternative research methods

Identifying strategies and principles to decolonise research during the data collection phase, and discussing the possibilities for alternative research methods to help decolonise research and M&E.

Day 4: How do we represent communities and why does it matter? Analysis and data sharing

Identifying strategies and principles to decolonise research during the analysis and sharing of data phase.
